## MULTILAYERED ENDPOINT PROTECTION TECHNOLOGY

ESET Endpoint Security provides multiple layers of protection and can detect malware before, during, and after execution. Machine learning, advanced behavioral analytics, big data and human expertise work in dynamic equilibrium to balance performance, detection and false positives.

- Protect against ransomware
- Block targeted attacks
- Prevent data breaches
- Stop fileless attacks
- Detect advanced persistent threats

CLOUD-BASED REMOTE MANAGEMENT CONSOLE

ESET PROTECT is a cloud-based, multifunctional remote network security management tool for ESET business security products across all operating systems. It enables one-click security deployment and gives you network visibility without the need to buy or maintain additional hardware, reducing the total cost of ownership.

- Setup and deployment within minutes
- No need for additional hardware or software
- Single point of network security management
- Accessible safely via web browser from anywhere

All ESET endpoint solutions are managed from a single-pane-of-glass cloud console, ESET PROTECT, ensuring a complete overview of your network.
